In 1987, we discovered the world's first computer virus.

In 1987, a high school student in Vienna wrote a virus (not surprisingly called "Vienna") that became a real nuisance and had in many ways sparked the creation of the antivirus industry. Letters were dropping from displays and computers started playing a hymn called "Yankee Doodle". As funny as this sounds, soon it became very clear that this problem was not with the hardware, it was a virus. So the battle began.

That's when Peter and Miro, the original ESET founders, cut their teeth **discovering** and fighting this world's first virus, leading us to where we are now.

HISTORY

- Discovered the first computer virus in the world in 1987
- Pioneers of antivirus protection
- Remains privately owned by the original founders
- The current CEO is the original ESET engine architect

WHERE WE ARE NOW

- The fastest-growing security software vendor in the global top-5 according to Gartner.
- The only solution in the world that has never missed an In-the-Wild virus
- The first and only IT security company to earn over 100 Virus Buletin awards (Oscars of the industry)
- Over 150,000,000 users
- 208 countries
- 2,000 employees
- 4,000% global revenue growth 2006 - 2016

USER BENEFITS

- Fast accurate detection
- Minimal resource impact
- Minimal intrusion
- Ease of use
- Prompt local support

PRODUCTS

- Endpoint Security
- MSSP
- Data Encryption
- Two-Factor Authentication
- Data Loss Prevention
- Patch Management
- Backup & Recovery
- Threat Intelligence
- Enterprise Inspector

CLIENTS

- World's leading provider of internet search engine services*
- World's leading online social media and networking platform*
- Tesla
- Harvard University
- Unesco
- Greenpeace
- Deloitte
- KLM
- T-Mobile
- Canon
- Motorola
- Panasonic
- JVC
- Mitsubishi
- Honda
- Renault
- Subway
- University of Canberra
- University of Auckland
- Australian Electoral Commission
- Booking.com
